

Society for Clinical & Experimental Hypnosis (SCEH)

Membership Information

2009

Founded in 1949, the *Society for Clinical and Experimental Hypnosis* (SCEH) is an international organization and key founder of the ISH. SCEH membership is made up of of psychologists, social workers, psychiatrists, nurses, dentists, physicians, chiropractors and other health professionals dedicated to the highest level of scientific inquiry and the conscientious application of hypnosis in the clinical setting.

The membership of this Society represents a rare union of some of the finest academicians, researchers and clinicians whose collaboration is designed to support and inform the clinical work and research of its members and other professionals. SCEH members are the authors of the majority of research and clinical publications world wide.

A distinguishing feature of the group is its premise that sound clinical practice is built upon serious scientific inquiry and that important empirical questions are often raised by those who care for patients.

Through workshops, lectures, publications and other teaching activities of SCEH, members educate health care professionals, academicians, students and the general public about the nature and ethical uses of hypnosis and related phenomena.

THE BENEFITS OF MEMBERSHIP

- **Colleagues**
- **Annual Meetings**
- **#1 Journal in Hypnosis (IJCEH)**
- **Access to Prominent Scientists and Clinicians**
- **Collaboration**
- **Continuing Education from International Experts**
- **Mentoring of Young and New Professionals**
- **Public Education**
- **Referral Service**

At a time when managed care companies and the general public seek ways to establish those who are truly competent to deliver specialized clinical services, this process alone is a way to demonstrate that your training and credentials have been found to be acceptable by a committee of experts in the field.

OUR MOST PRIZED ASSET IS OUR MEMBERSHIP!

This is a selective society that contains some of the best and most productive hypnosis researchers and clinicians in the field. In the past five decades, the majority of the important English language publications in the field of scientific hypnosis have been written by members of the Society. You will also have the opportunity to ask questions, exchange ideas and collaborate with those who are most experienced with a variety of clinical problems and techniques in hypnosis.

ANNUAL CONFERENCE

Each year, the membership of the Society sponsors its workshops & scientific meetings. As a member, you are entitled to a discounted registration for any continuing education programs that you choose to attend, as well as for the scientific meetings. Our Continuing Education programs are directed to professionals at all levels and includes workshops on:

- **Introductory Training**
- **Intermediate Training**
- **Advanced Clinical Techniques**
- **Applications in Behavioral Medicine**
- **Pain Control**
- **Habit Disorders**
- **Dentistry**
- **Research Design & Strategies**
- **Psychotherapy**
- **Pediatrics**

The Scientific Meetings present symposia on such important issues as:

- **Neurological Markers for Hypnotizability**
- **New Clinical Applications of Hypnosis**
- **Trauma and Dissociation**
- **Expert Testimony**
- **New Research in the Field**

The International Journal of Clinical and Experimental Hypnosis comes free to you with your SCEH membership. This prestigious publication is the leading journal in the field world wide and is among the most cited journals in the psychological literature. It is peer reviewed by some of the most prominent scholars in the world and presents topical and well designed studies for 'students' of hypnosis.

Membership applications are available at www.sceh.us or you can call, write or email SCEH.
